# GREAT WESTERN LETS A CONTRACT

Tunnel Is to Be Extended Another 300 or 400 Feet.

LITTLE BELL HAS GALENA

BLACK JACK ORE BRINGS HIGH PRICE IN MARKET.

The Great Western Gold & Copper Mining company, operating at the head of Big Cottonwood canyon, adjoining the

Appeal is Expected.

Appeal is Expected.

Modena, Oct. 5.—A decision, it is said, has been rendered in the Snowflake-Minneling. The terms of the contract provide that an additional 100 feet may be called for at the price agreed upon, in case the management decides to continue after the 300 feet has been driven.

A short time ago it was announced that the mineralization in the face of the company's long tunnel indicated the near approach to the main ore-bearing channel. A thorough surface examination of the ground has since been made and the conclusion has been reached that no matter what the tunnel develops in the way of mineral as the work progresses, the ifing to do is keep driving until the great porphyry dyke that cuts through the company's immense block of patented ground has been reached. Close calculations based on surveys show that to reach it something like 400 feet will yet have to be driven through the lime. The principal copper-bearing zone runs parallel with this dyke and the main deposits of ore are counted upon to have found an abiding place beneath its shelter. It the ground has since been made and the conclusion has been reached that no matter what the tunnel develops in the way of mineral as the work progresses, the thing to do is keep driving until the great porphyry dyke that cuts through the company's immense block of patented ground has been reached. Close calculations based on surveys show that to reach it something like 400 feet will yet have to be driven through the lime. The principal copper-bearing zone runs parallel with this dyke and the main deposits of ore are counted upon to have found an abiding place beneath its shelter. It is thought very possible that much ore will have made its way out into the bedding planes, but deposits equal to the best found in the state are expected to be found in the contact.

A great deal of money has already been spent in the development of this property and the owners are not worrying over final results. Great bodies of low grade copper ore, ore carrying from 2 to 6 per cent of the red metal, have been uncovered at the surface and there is no doubt in the minds of those who have been pouring in their money that the day is coming when they will be able to say that they have one of the biggest copper mines in the west. Six months hence the minc should be heard from in no uncertain manner.

WILL MAKE BIG MINE.

### So Says Uncle Jesse Knight Concerning Bullion-Beck Tunnel.

Aside from the two or three small dividends that he received from the shipment of ore from his Salvator property last year, it is four years since Jesse Knight, the wizard of Tintic, has made any money out of his mining propositions. During that time he has poured into the ground and paid out in the purchase of ground something like \$250,000. He is now of the opinion, however, that the tide has turned and, during the next twelve months, he expects to begin getting returns from two and possibly three of his properties.

He stated yesterday that he had greater faith in the Bullion-Beck Tunnel Consolidated than any of the rest, so far as the prospects for early results were concerned. Last week he opened up a fine mineral-bearing fissure his a crosseut 200 feet from the 300-foot level in the La Reine shaft. There is several feet of quartz carrying lead and silver, and considerable of it, he says, is not what is known as the La Reine seyin, but it parallels it at a distance of about the first parallels it at a distance of about cet of quartz carrying lead and silver, and considerable of it, he says, will asy to ship. This fissure, he says, is not what is known as the La Reine vein, but it parallels it at a distance of about 1.006 feet down the hill to the east. Not enough work has yet been done to give good idea of what the vein may be expected to show, but from his knowledge of the country and the character of the ore now being encountered, he is very sanguine that he is going to make a hig mine of the property. The ranch land which Mr. Knight bought the other day from the Beck Tunnel company is on the summit of the hill just this side of the town of Eureka. There are three good wells on the property, and three houses which rent for enough money to pay good interest on the purchase price of \$1.500. It was the water, however, that caused Mr. Knight to make the purchase, for while the company has sufficient for

# BAMBERGER-DE LAMAR MINES.

### Old and New Portions of the Mine Are Growing All the Time.

Reviewing operations at the Bamberser De Lamar properties at De Lamar, Nev., the last issue of the Lode says:

"Work at the company's mine is being energetically pushed by Foreman Heath. The norise in the new ore body on the sixth level is being shoved skyward, and continues of the same rich quality and dimensions. In fact, this infant bonauza, as work progresses, finding to bonauza, as work progresses, the dicates that it will be as big a man as its daddy, and fully equal to it in richneas.

ouality and dimensions. In fact, this infant bonanze, as work progresses, the dicates that it will be as big a man as its daddy, and rully equal to it in richneas.

"The ore body in the Korkskrew better known as the Hog Pen, keeps nobly growing in dimensions. The ore on the eleventh and twelfth levels continues about the same. A new and substantial hoist is being erected on the tenth lavel for facilitating the extraction of ore, a skip being placed thereon. The ore on these levels is loose; and several cayes in the mine have recently occurred. This plainly shows the ore hody has ample room to exhand and is liable to grow in magnitude. A drift has been run in on ore on the twelfth level for a distance of eighty feet.

"The mill, under the supervision of Jack Angus, continues running steadily, grinding up about 250 tors of ore per day. The mill department is running as smoothly as one could desire, and in the extraction of the yellow metal is a No. 1.

"The erection of the new works for leaching the old tailings dump is going on as ranidly as circumstances will admit, and will be pushed to early completion."

Slide Down the Line.

New York Bonanza continued its headlong plunge, toward the zero mark yesterday and when the day closed the stock had sold for 16½ c per share. May Day and Uncle Sam also showed a little weak-ness, but otherwise the market was in as good condition as it has been for several days. During the day a total of 20,000 shares of stock, with a selling value of shares of stock, with a selling value of shares of stock, with a selling value of shares at 13c and May Day was allowed to go at 7½c. Columbus Consolidated, on the open board, continued strong around \$2.21 and Daly-Judge was taken in at \$6. Lower Mammoth sold at 23½c and Uncle Sam did business at 25c to 29c. Star Consolidated was stiff at 17½c to 18c, as was also when the day closed the stock had sold for 120,000 shares of stock, with a selling value of 5½c. Columbus Consolidated, on the open board continued strong around \$2.21 and Daly-Ju

# STRIKE IN LITTLE BELL.

# Nearly a Foot of Galena Ore Is En-

countered in the Fissure. Good news reached the city last evening from the Little Bell, at Park City. From a source that is next to authoritative it is learned that in the drift through the fissure that has been progressing for some time past in the direction of the contact, fully ten inches of fine galena has made its appearance. When this class of ore began making in the face the drift had been extended 210 fect.

Superintendent Newton Dunyon is reported as stating that every foot's advance toward the contact is making it all the more certain that a big shoot of rich ore will be encountered. The raise that is being made in the fissure where the showing was the best after its opening in the drift being sent into the West Quincy is also reported to be looking fine and all hands at the property are rejoicing in consequence.

# NEWS FROM SNAKE CREEK.

# Southern Tier Property Has Two Wabash

Fee. of Rich Ore.

W. D. Bogan and P. H. Tallon, the veteran Park City mining men who always make it a point to mingle with the tarongs in Zion at conference time, are not the city having a good time. Mr. Bogan, who is doing a great deal of development work on his Snake creek properties and who hopes to have good news to relate before spring, states that when ne left camp on the Snake creek side of the district it was reported to him that Fee- of Rich Ore.

F. W. Hayt had opened up two feet of fine ore in the Southern Tier.

"I did not find it convenient to come out by the Southern Tier mine." said Mr. Bogan, "but the news came direct to me from the property and I have no reason to doubt its accuracy.

"It is also reported that the Biz Four company, the management of which is held by Heber City operators, has recently made a good showing and as there has been considerable gork done there this season I san inclined to believe the report has foundation in fact."

Mr. Bogan reported that there had been a great deal of work done in the Snake Creek district during the season and he expressed the opinion that that region would soon be making a noise in the mining world. The Steamboat company has simply performed whatever assessment work it had to do and the men had been pulled off for the season. He will return to camp in a day or two and make all preparations for a full winter's campaign at his property, in which he has already done more than 800 feet of work.

at his property, in which he has already done more than 800 feet of work.

### SNOWFLAKE LITIGATION.

### Decision Rendered from Which No Appeal Is Expected.

### BLACK JACK ORE.

### Twenty-seven Tons Bring Over \$2,-121 from Smelter.

For twenty-seven tons of ore from the Black Jack property at Tintle Uncle Jesse Knight yesterday received a chack for over \$2,121, or better than \$78.50 per ton. This is the third shipment that has been made from the property since Mr. Knight bought out David Evans. some sixty days ago.

"I have not got the ore in the quantity I would like," said Mr. Knight during the morning, "but the showing is such that there is reason to believe that some good ore bodies exist in the ground. The ore now being mined comes from the 1,300 and the 1,400-foot levels. On the former a number of caves are being encountered, and the ore makes in the bottom of them, for the most part. It is going to take some time and work to demonstrate the real value of the ground, but it looks more cacouraging now than it has ever done."

### ANNIE LAURIE EXTENSION.

### Second Ledge Is Now Being Ap proached in Long Tunnel.

Manager L. H. Outzen of the Annic Laurie Extension company's Gold Mountain properties, came up from the south Thursday night. He stated yesterday that while he had not been at the property for some little time past, on account of work that he was doing on the Marysvale side, he had the best kind of reports from the mine.

After cytting the first fissure at a distance of 500 feet in the tunnel, it was decided to keep straight ahead and catch the second one that is known to run through the company's territory. Over 200 feet has now been driven from the first ledge and the foreman in charge advises Mr. Outzen that mineral is begin ning to make its appearance and expecting to reach the main ledge ing the pext few dars if it holds any ing the pext few days if it holds any like the dip indicated in the surface

# Southern Boy Incorporated.

Articles of incorporation of the Southern Boy Gold Mining & Milling company were yesterday filed in the office of the county clerk. The capital stock is \$300,000, in 50-cent shares. The company owns the Faha B Nos. 2, 4, 5, Kentucky Boy. Kentucky Boy Nos. 1, 2 and 2, in the Ohio and Gold Mountain mining districts of Plute county. A. Carl Finch is president; William L. Neal, vice president and general manager; C. J. Bownan, secretary and treasurer. They with Perry M. Neal and T. A. Cook, constitute the board of directors.

# Cleaned Up Six Million Dollars.

A message over the private wire of James A. Pellock & Co, says:
"The Boston Herald has a dispatch from Pittsburg that president Corey of the steel trust and associates of Pittsburg have just cleaned up a profit of \$6,00,00 in the North Butte mine. Perhaps that is where all the stock has been coming from lately."

### Utah Stocks in Boston.

James A. Pollock & Co., bankers and brokers, yesterday received over their private wire from Paine. Webber & Co., one of their Boston correspondents, the record of sides of Utah stocks on the Boston market, with range and closing quotations:

Boston, Oct. 6.—The sharp advance in Frankiln. Rhode Island and Arcadian was the feature of the market today. The finding of the Kearsarge lode on the Frankin created considerable enthusiasm and the stock was bid up very quickly. We think it would be a good plan to take profits around this level until the value of the lode is more clearly established.

Money is a little easier, but not enough so to encourage any buying on stocks as yet, except on reactions. Quotations:

# Mining Notes.

According to advices that have reached he local offices, Samuel Newhouse is According to advices that have reached the local offices, Samuel Newhouse is now in New York.

Another carload of rich silver-lead ore from the Utah mine, of Fish Springs, will be settled for today.

Two cars of ore from Alia, two from Nevada and one from Tintic were reported at the Pioneer sampler yesterds.

morning.

The Taylor & Brunton sampler was yesterday in receipt of six cars of ore from Tintic, one from Big Cottonwood and one from Fish Springs. Frederick Lyon, constructing engineer of the United States company's smeller in California after a day's delay, pulled out for camp again yesterday noon. The Bingham-New Haven company's aerial tramway is completed and within the next day or two it is expected to be

handling the product of the company's mines at Blugham. Ernest L. Godbe has returned from a trip to Cherry Creek, Nev., where he has been making an examination of mining property. He believes the camp is going to jump right to the front.

Baker City Democrat: Tommy Adkinson, one of the oldest, liveliest and best known mining men in this section, and who has been all over the world, left yesterday for Utah and Nevada, where he is going to look into some propositions for local capital.

he is going to look into some propositions for local capital.

David Fisher, who has the contract for running the tunnel on the Columbus company's Park City property, is down from camp for a day or two. He says that good progress is being made and that he now has everything in snug shape for the winter's work.

Frank Jardine has returned from a trip into the old found district, where he went to make an examination of some of the properties there. He states that all the district needs is money and a determination to open the mines as they ought to be opened to make it a prosperous and moneymaking camp.

Treasurer Schirmer of the Boston Consolidated company says: "There is absolutely not a word of truth in the Boston Journal's statement to the effect that the Boston Consolidated company will be included in any mining combination which Mr. J. A. Coram and his associates may be at work upon."

Blackfoot Mail: W. O. Young, county supports the support of the county supports the county supports the county supports the county supports and the county supports the county supports

ciates may be at work upon."

Blackfoot Mail: W. O. Young, county surveyor, returned Monday from Camp Wilbur with J. T. Hodson, J. H. Stalling, jr., and Captain J. H. Stalling, sr., prominent Salt Lake mining men. These people are so much pleased with the slowing at Camp Wilbur that they have decided to buy the property, and the deal will be consum vated at once. The deal means that something big will be done at this new bonanza camp.
